SUMMARY

Engineering leader with a frontend foundation and 8+ years of experience building and shipping reliable, user-focused software. As Head of Frontend at The Despatch Company, drives frontend architecture, performance, product quality and delivery for e-commerce and logistics products, working closely with product, design and backend teams. Uses AI-assisted development, LLM-powered tools and agentic coding workflows across the software delivery lifecycle, from clarifying requirements to building, testing, reviewing and improving production-ready software, while staying accountable for technical decisions and the quality of what ships. Holds a degree in Management Information Systems and is completing a Law degree, adding business and legal perspective to engineering.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, Vue.js, Nuxt, React, Next.js, React Native, Node.js, Express, GraphQL (Apollo)

AI-Native Engineering: AI-assisted development, LLM-powered tools, agentic coding workflows, AI-assisted code review and testing

Frontend Architecture & Quality: Component architecture, design systems, web performance optimization, coding standards, Vitest, Jest, Cypress

Tools & Platforms: Tailwind CSS, Vuetify, PrimeVue, Pinia, Redux, Vite, Expo, Elasticsearch, MongoDB, Docker, AWS (S3, Lambda), Vercel, Firebase, Supabase, Git, CI/CD

Leadership: Technical direction, team mentoring, cross-functional collaboration, product delivery

WORK EXPERIENCE

The Despatch Company Apr 2023 – Present
Driffield, England, United Kingdom (Remote)

Head of Frontend Feb 2025 – Present

- Drive frontend technical direction for user-focused products supporting e-commerce and logistics operations.
- Shape frontend architecture, performance, engineering quality and delivery practices across Vue.js, Nuxt and React applications.
- Build and use AI-assisted workflows across implementation, testing, code review and product delivery.
- Work with product, design and backend teams to turn operational needs into reliable, scalable software.
- Establish coding standards and best practices; mentor and manage frontend developers.
- Remain hands-on, coding and contributing to key projects while ensuring performance, scalability and reliability.

Senior Frontend Developer Apr 2023 – Feb 2025

- Transformed Figma designs into fully functional web applications using Nuxt.js and Vue.js.
- Collaborated closely with the design team to ensure pixel-perfect implementation and high UI/UX standards.
- Developed applications that improve order processing and shipping workflows for e-commerce companies and warehouses.
- Integrated APIs and backend services to create seamless user experiences and improve order management.
- Built reusable components and optimized application performance for speed and responsiveness.

RIGHTYON — Frontend Developer Jan 2022 – Apr 2023

Istanbul, Türkiye

- Developed and maintained a complex vehicle tracking web application using Vue.js, JavaScript, HTML and CSS.
- Built SEO-optimized marketing landing pages using Nuxt.js and Tailwind CSS.
- Developed a CRM web application to track customers of another SaaS product of the company.
- Contributed to a vehicle tracking mobile app built with React Native.
- Worked with GraphQL queries using the Apollo GraphQL library.
- Implemented Google Maps JavaScript API features including Geolocation, Places and Directions.

Freelance — Full Stack Web Developer Apr 2018 – Jan 2022

Istanbul, Türkiye

- Developed and deployed full-stack applications with the MERN stack (MongoDB, Express, React, Node.js), focusing on performance, scalability and usability.
- Worked with a diverse range of clients to troubleshoot and resolve complex coding issues.
- Managed multiple projects simultaneously, delivering on time and to high quality standards.
- Designed and developed custom WordPress websites for various clients.

EDUCATION

Selçuk University Expected 2027

Bachelor's Degree, Law

Anadolu University May 2026

Bachelor of Science, Management Information Systems

Atatürk University Jun 2023

Associate of Science, Computer Programming

Turkish National Defense University Aug 2010

Bachelor of Science, Naval Architecture and Marine Engineering
